Application US/09371772B

Sequence 4611. Application US/09371772B

Partent No. 6566127

GENERAL INPORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ravoo, Pam

APPLICANT: Ribozyme Pavoo, Pam

APPLICANT: Recobedo, Jaine

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: UNMER: US/09/371,772B

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR PILING DATE: 1995-10-26

PRIOR PILING DATE: 1995-10-26

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: Patentin Version 3.0

SEQ ID NO 4611

LENGTH: 17
                                                                APPLICANT: McGwiggen, Jim
APPLICANT: McGwiggen, Jim
APPLICANT: Stinchcomb, Dan

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ò
                                                                                                                                                                                                                                                                                                                   ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length 17;
                                                                                                                                                                                                                                                                                                              2; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 7223, Application US/08584040

Patent No. 6346398

GENERAL INFORMATION:

APPLICANT: Pavco, Pamela

APPLICANT: Pavco, Pamela

APPLICANT: Bacobedo, James

APPLICANT: Escobedo, James

TITLE OF INVENTION: METHOD AND REAGENT FOR THE

TITLE OF INVENTION: TREATMENT OF DISEASES OR

TITLE OF INVENTION: CONDITIONS RELATED TO LEVELS

TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL

TITLE OF INVENTION: GROWTH FACTOR

NUMBER OF SEQUENCES: 8502

CORRESPONDENCE ADDRESS:

ADDRESSER: Lyon & Lyon

STREET: Suite 4700

CITY: Los Angeles

COUNTRY: US.A.

ZATE: Galifornia

COUNTRY: US.A.

MEDIUM TYPE: 3.5" Diskette, 1.44 Mb

MEDIUM TYPE: Streen

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 1473, Application US/08584040

Patent No. 6346398
GENERAL INFORMATION:
APPLICANT: Pavco, Pamela
APPLICANT: Barinchoomb, Dan T.
APPLICANT: Stinchcoomb, Dan T.
APPLICANT: Stinchcoomb, Dan T.
APPLICANT: Scobedo, Jaime
TITLE OF INVENTION: TREATMENT OF DISEASES OR
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: GROWTH FACTOR
NUMBER OF SEQUENCES: 8502
CORRESPONDENCE ADDRESS:
CONDITIONS RELATED TO LEVELS
OF VASCULAR ENDOTHELIAL
GROWTH FACTOR

                                                                                                                                                                                                                                                                                                 CITY: Los Angeles
STREET: Sulle at columnary: CITY: Los Angeles
STATE: California
COUNTRY: U.S.A.
ZIP: 90071-2066
COMPUTER READABLE FORM:
MEDIUM TYPE: Storage
COMPUTER: Storage
COMPUTER: BM Compatible
OPERATING SYSTEM: IBM P.C. DOS 5.0
SOFTWARE: Word Perfect 5.1
CURRENT APPLICATION NUMBER: US/08/584,040
FILING DATE: January 11, 1996
CLASSIFFCATION NUMBER: 60/005,974
FILING DATE: October 26, 1995
ATTORNEY/AGENT INFORMATION:
NAMME: Warburg, Richard J.
REGISTRATION NUMBER: 32,327
REGISTRATION NUMBER: 32,327
REGISTRATION NUMBER: 32,327
REGISTRATION NUMBER: 32,327
FILING DATE: October 26, 1995
ATTORNEY/AGENT INFORMATION:
NAMME: Warburg, Richard J.
REGISTRATION NUMBER: 32,327
FELEFRAMONICATION NUMBER: 32,327
FELEFRAMONICATION NUMBER: 218/064
TELEFRAMONICATION NUMBER: 32,327
FELEFRAMONICATION NUMBER: 32,327
FELEFRAMONICATION NUMBER: 1463:
SEQUENCE CHARACTERISTICS:
LENGTH: 17 Dase pairs
TYPE: NUCLEIC acid
TITLE OF INVENTION: CONDITIONS REI
TITLE OF INVENTION: OF VASCULAR EN
TITLE OF INVENTION: GROWTH FACTOR

Patent No. 613267

Patent No. 613267

APPLICANT: Susan Grimm

APPLICANT: Dan T. Stinchcomb

APPLICANT: James McSwiggen

APPLICANT: Sean Sullivan

APPLICANT: Renatch G. Draper

TITLE OF INVENTION: RIBOTYME TREATMENT OF

TITLE OF INVENTION: BISASES OR CONDITIONS

TITLE OF INVENTION: RELATED TO LEVELS OF

TITLE OF INVENTION: NITRACELLULAR ADHESION

TITLE OF INVENTION: NITRACELLULAR ADHESION

TITLE OF INVENTION: MOLECULE-1 (1-CAM-1)
APPLICANT: Kenneth G. Draper
TITLE OF INVENTION: RIBOZYME TREATMENT OF
TITLE OF INVENTION: BISEASES OR CONDITIONS
TITLE OF INVENTION: RELATED TO LEVELS OF
TITLE OF INVENTION: NUTRACELLULAR ADHESION
TITLE OF INVENTION: NOLECULE-1 (I-CAM-1)
NUMBER OF SEQUENCES: 2390

Sequence 5, Application US/0881687

Patent No. 5568793

GENERAL INFORMATION:

APPLICANT: LIU, ZHAN-BIN

APPLICANT: ODELL, JOAN T.

ITILE OF INVENTION: SPECIFIC GENE ACTIVATION BY CHIMERIC TITLE OF INVENTION: TRANSCENIPTION FACTORS IN STABLE TITLE OF INVENTION: TRANSCENIC PLANTS

NUMBER OF SEQUENCES: 36

CORRESPONDENCE ADDRESS:

ADDRESSEE: E. I. DUPONT DE NEMOURS AND COMPANY
STREET 1007 MARKET STREET

CONFUTER EADABLE FORM:

MEDIN TYPE: DILAMARE

COMPUTER READABLE FORM:

MEDIN TYPE: DISKETTE, 3.50 INCH

COMPUTER: DISKETTE, 3.50 INCH

COMPUTER: DISKETTE, 3.50 INCH

COMPUTER: DISKETTE, 3.50 INCH

SOFTWARE: MICROSOFT WORD FOR WINDOWS 95

CURRENT APPLICATION NUMBER: US/08/881,687

FILING DATE:

TABLE OF INVENTION NUMBER: US/08/881,687
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö

US-08-379-078-449/c

Sequence 449, Application US/08379078

Patent No. 5639612

GENERAL INFORMATION:

APPLICANT: Mitsuhashi, Masato

APPLICANT: Cooper, Allan

TITLE OF INVENTION: Gene Detection System

NUMBER OF SEQUENCES: 726

CORRESPONDENCE ADDRESS:

ADDRESSEE: KNOBEE, MARTENS, OLSON AND BEAR

STREET: 620 Newport Center Drive 16th Floor

CITY: Newport Beach

STATE: Cooper STATE: Coo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          COMPUTER READBLE FORM:

Sequence 69, Application US/09109663

Patent No. 6277981

APPLICANT: Tu, Guang-Chou

APPLICANT: Tatach, Yedy

TITLE OF INVENTION: AN IMPROVED METHOD FOR DESIGN AND SELECTION OF

TITLE OF INVENTION: BFEICACIOUS ANTISENSE OLIGONUCLEOTIDES

FILE REPERENT APPLICATION NUMBER: US/09/109,663

CURRENT PILING DATE: 1998-07-03

EARLIER APPLICATION NUMBER: 60/051,705

EARLIER PILING DATE: 1997-07-03

NUMBER OF SEQ ID NOS: 81

SOFTWARE: Patentin Ver. 2.0

Sequence 52, Application US/09270956

Sequence 52, Application US/09270956

Patent No. 6451270;

APPLICANT: Loeb, Lawrence A. APPLICANT: Loeb, Lawrence A. APPLICANT: Black, Margaret E. TITLE OF INVENTION: THYMIDINE KINASE MUTANTS NUMBER OF SEQUENCES: 104

CORRESPONDENCE ADDRESS:

ADDRESSEE: SEED and BERRY LLP

STREET: 6300 Columbia Center, 701 Fifth Avenue CITY: Seattle
TELEPHONE: 617 248 5000
TELEFAX: 617 248 4000
INPONATION FOR SEQ ID NO: 45:
SEQUENCE CHARACTERISTICS:
LENGTH: 16 base pairs
TYPE: nucleic acid
STRANDEDNESS: single
TOPOLOGY: not relevant
MOLECULE TYPE: other nucleic acid
DESCRIPTION: /desc = "RNA"
                                                                                                                                                                                                                                                                                                                                                                                                                                                 272 GGAGCAGGGCGCAC 286

'PACENT NO. 585591

'GENERAL INFORMATION:

'APPLICANT: LOPEZ-Berestein, Gabriel

APPLICANT: Tari, Ana M.

'TITLE OF INVENTION: LIPOSCOMAL PHOSPHODIESTER,

TITLE OF INVENTION: PHOSPHOROTHIOATE, AND p-ETHOXY OLIGONUCLEOTIDES

TITLE OF INVENTION: PHOSPHOROTHIOATE, AND p-ETHOXY
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Length 16;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  RESULT 342
UG-08-981-321-5/C

UG-08-981-321-5/C

Sequence 5, Application US/08981321A

Patent No. 6146871

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION:

TITLE OF INVENTION: TB-(4-CARBOXYBUTANAMIDE)

TITLE OF INVENTION: PROCESS FOR MODIFYING THE ENZYME

TITLE OF INVENTION: PROFITYING SAID ENZYME IN A SINGLE CHROMATOGRAPHIC STEP

TITLE OF INVENTION: PROFITYING SAID ENZYME IN A SINGLE CHROMATOGRAPHIC STEP

TURRANT APPLICATION NUMBER: US/08/981,321A

CURRANT APPLICATION NUMBER: PGC/ES97/00098

| Sequence 35, Application US/0969036
| Patent No. 6608191
| GENERAL INFORMATION:
| APPLICANT: Anderson, Kevin P. |
| APPLICANT: Hancak, Romie C. |
| APPLICANT: No. 660819184, Chikateru C. |
| TITLE OF INVENTION: Compositions and Methods for Treatment of Hepatitis C ITLE REPRENCE: ISPH-0517 |
| TITLE OF INVENTION: Virus-Associated Disease |
| PRIOR FILING DATE: 1997-12-10 |
| PRIOR PELING DATE: 1995-05-30 |
| PRIOR PELING DATE: 1995-05-30 |
| PRIOR PELING DATE: 1995-03-30 |
| PRIOR FILING DATE: 1992-09-10 |
| NUMBER OF SEQ ID NOS: 37 |
| VAMPER OF SEQ ID NOS: 37 |

Patent No. 5607923

GENERAL INFORMATION:
APPLICANT: Phillip Dan Cook and Glenn Hoke
TITLE OF INVENTION: Oligonuclectides For Modulating
TITLE OF INVENTION: Ottonegalovirus Having Phosphorothioate Linkages Of High Chira
TITLE OF INVENTION: Purity
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
ADDRESSED: Woodcock Washburn Kurtz Mackiewicz and No. 5607923ris
STREET: One Liberty Place - 46th Floor
CITY: Philadelphia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 4, Application US/08244993
; Sequence 4, Application US/08244993
; Patent No. 5623065
; GENEAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Oligonucleotides
TITLE OF INVENTION: Oligonucleotides
NUMBER OF SEQUENCES: 12
CORRESPONDENCE ADDRESS:
ADDRESSEE: Woodcock Washburn Kurtz Mackiewicz
STREET: One Liberty Place - 46th Floor
CITY: Philadelphia
STATE: PA
